### Facilities in the College for the management of the degradable and non-degradable waste:

The college has established effective facilities for managing both degradable and non-degradable waste to maintain cleanliness and environmental sustainability. Separate dustbins are provided for degradable and non-degradable waste, ensuring proper segregation at the source. E-waste is collected and stored separately, and its disposal is managed responsibly in collaboration with external firms specializing in e-waste management. Dustbins are strategically placed across all buildings and throughout the college premises to promote proper waste disposal among students and staff. These measures reflect the college's commitment to maintaining a clean and eco-friendly campus environment.
